Course Description- The Personalized Learning Program Health Course is to provide students with the skills and health literacy necessary to make informed decisions throughout all grade level courses (9-12). Students will acquire the knowledge and skills necessary to address health concerns at various stages of development. Students are encouraged to achieve optimal health through recognizing health issues and applying preventative strategies to promote optimal wellness. By connecting academic content to real-life scenarios, students understand the impact of personal choices and external factors on individual health and the overall health of the community.
