September 30, 2021

Dear Parents/Guardians,

The COVID 19 Pandemic has caused our building to make significant changes. One change was having to turn off water fountains to avoid facial contact. However, we are proud to say that the district has purchase plastic water containers for every student. These water containers will be distributed to all students on Tuesday, October 5, 2021, during their homeroom period. Students will be given time to write their names on the water containers. Water fountains will be available for students to fill their containers during the school day beginning on Tuesday, October 5, 2021. We encourage you to have your child bring their container filled with water every day. Bottled water will no longer be available in school. Thank you for your continued support.

Sincerely,

Mr. Jose Santos
