## SUMMER ASSIGNMENT Geometry Honors

As an incoming Geometry Honors student, it is important that you are proficient in several skills from previous math courses. The following exercises are intended to provide a review of the essential math skills you are expected to know as you enter Geometry Honors this September.

Use a pencil and SHOW ALL WORK. Work must be legible, well organized and solutions clearly labeled. You should show and/or explain how you arrived at all answers. Please do not wait until the last day of vacation to get started.

This assignment is due the first day of school. If you are unsure how to solve any of the problems, it will be to your advantage to review online. Suggested websites are:
